UST Scan and Go with Loss Prevention

UST Scan and Go, is a self-checkout experience for shoppers.

Shopping made
easy

ust.com

UST provides for Android and iOS users a '**UST Scan and Go**' app and SDK for download in both iTunes and Google Play Store.

UST Scan and Go

UST Scan and Go is a mobile-based application which delivers self-checkout software to customers.

Customers select merchandise from the shelf, scan the product with the mobile app and add the item to their shopping cart.

Once selected items are added to their shopping cart, customers can generate a self-checkout QR code. Customers can pay at any kiosk based on the elected payment mode.

Registered user app

- Standard package
- Weight-based
- Age-restricted
- Counter served

UST Scan and Go

An IDEAL solution for retail

- **Cost savings:** Retailers eliminate traditional checkout counters and save money on on-going licenses, maintenance, costs, etc.
- **Improved efficiency:** Promotes the in-store experience by removing all points of friction.
- **Customer empowerment:** Redefined shopping experience for customers: enter the store, scan products, pay and leave enabling them to spend more time shopping and less time in long checkout lines.
- **Real-time interaction with customers:** loyalty and reward programs integrate easily, enabling customer engagement.
- **Reduce resource strain:** Retail stores face surges of customers during peak hours. UST Scan and Go supports increased revenue and reduces abandoned carts.

Customer Benefits

No waiting in long lines

Intuitive user interface

No line mobile payment

Variety of payment methods

Data-driven, personalized recommendations

Safe, secure touchless transactions in seconds

Integrated customer loyalty programs

UST Scan and Go: Regular store format

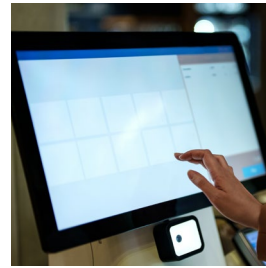

Scan the items you want to buy with the scan app.

Items are added to the UST Scan and Go app to verify the final purchase.

Customer walks to the UST Scan and Go kiosk with QR code after shopping.

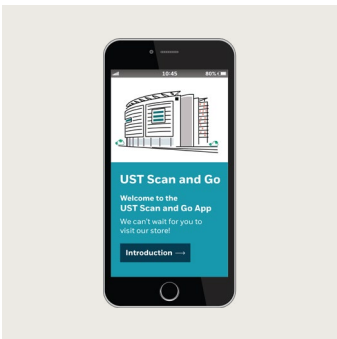

Cart items are reflected on the screen when the customer scans the QR code to the kiosk.

Customer confirms available items on the screen and pays for them. The UST loss prevention solution can be integrated in this kiosk for enhanced operating efficiency.

UST Scan and Go with cart: Supports loss prevention

Customer downloads the UST Scan and Go app and logs in.

Customer selects a cart [enabled with weight sensors] and scans the cart using the UST Scan and Go app. The cart light turns **blue** allowing the customer to start shopping.

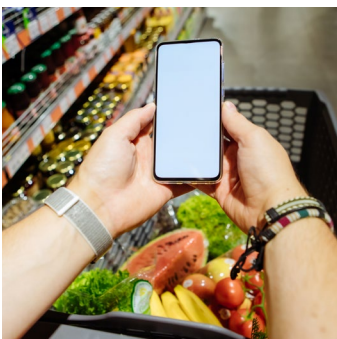

Using the UST Scan and Go app the customer scans the product barcode and places the item in the cart.

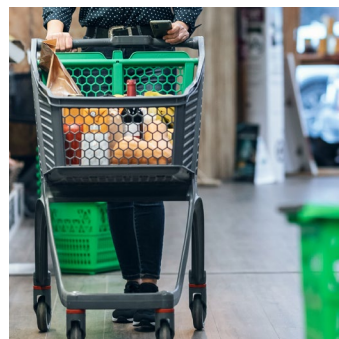

Once finished, the customer presses checkout in the mobile app.

*If weight mismatch shows the cart light will turn red.

Customer gets the notification and is asked to re-check the items scanned. Customer rescans the items or contacts the store manager for any missing or incorrect items.

Cart will turn **green** and customer is able to make the payment.

Customer walks out of the store.

For more than 23 years, UST has worked side by side with the world's best companies to make a real impact through transformation. Powered by technology, inspired by people and led by our purpose, we partner with our clients from design to operation. Through our nimble approach, we identify their core challenges, and craft disruptive solutions that bring their vision to life. With deep domain expertise and a future-proof philosophy, we embed innovation and agility into our client's organizations—delivering measurable value and lasting change across industries, and around the world. Together, with over 30,000 employees in 30 countries, we build for boundless impact—touching billions of lives in the process.
